

## PAYMENTS

We allow three different payment methods.

- CREDIT CARD\*

If you choose to pay by credit card, be aware that your transaction will be processed through a secure system. The data required will be processed by the BRAINTREE system, a highly advanced technological coding system using a secure server which will guarantee maximum protection for your data, and also ensure you receive a reimbursement should any problem arise.

- PAYPAL\*

Paypal is a payment accepted in 190 countries, for national and international payments. You can pay using this service even if you don't own a Paypal account, using your credit card in an easy and safe way. All the main credit cards are accepted.

\*In order to guarantee safety during all transactions, for all the payments through Credit Card this service uses:  
cryptographic protocol Secure Sockets Layer 3.0 (SSL) or the next version. This protocol protects the integrities of your datas during the transfer to our servers, using a cryptographic key of 168 bit length (the highest on the market).
